Hebden Bridge Flood Alleviation Scheme

September 2026

The Environment Agency is working with Calderdale Council to design and build a Flood Alleviation Scheme for Hebden Bridge.

Project Update – Temporary Changes to the Flood Information Centre

The Hebden Bridge Flood Alleviation Scheme (FAS) team is currently focused on securing funding for the scheme and progressing the necessary internal approvals, assurance checks and procurement activities.

As this work continues, the Flood Information Centre on Valley Road will be used primarily as office accommodation for the project team and wider Environment Agency staff, rather than operating as a public drop-in facility.

Although the centre will not be open for drop-in visits, the project team are available to answer questions and discuss the plans for the scheme. If you would like to speak with a member of the team, please contact us via the project mailbox and we can arrange a meeting where appropriate.

We recognise that the community remains interested in the progress of the scheme and will continue to share updates when there is new information to communicate.
