

# Calderdale Flood Plan: achievements delivered during 2025/26

## Strengthening Defences

Phase 1 of the flood scheme at Copley is now complete, helping to better protect 229 properties from flooding.

50+ homes protected via Erringden Hillside Property Flood Resilience Scheme (PFR).

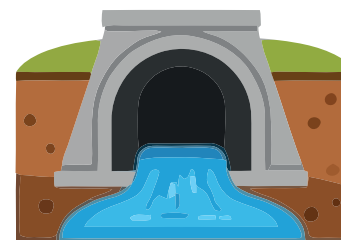

Cottonstones Mill Pond infrastructure is complete and will protect local homes from severe run-off.

Wellholme Park reopened following major flood defence upgrades. The works protect 400+ properties, restored 0.54km of river, and improved 52 hectares of habitat.

## Resilient Infrastructure

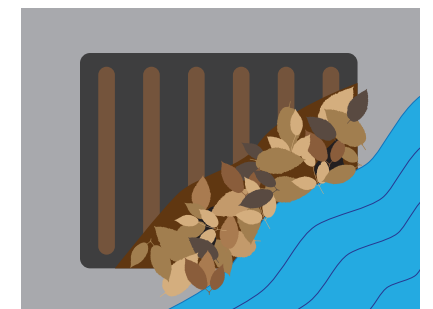

Repaired key culverts to boost drainage performance and infrastructure resilience.

Completed embankment reinforcement at Oak Hill Clough, Todmorden to improve slope stability and prevent erosion.

Maintained NFM features to ensure long-term flood protection.

Upgraded drainage and gullies across key hillside roads on Erringden hillside.

## Natural Flood Management (NFM)

Landscapes for Water project planted 55,000+ trees and installed 1,800+ leaky dams and pools.

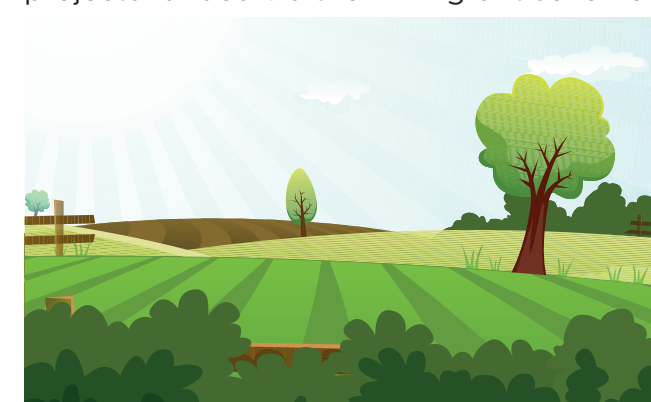

Three new NFM postgraduate opportunities launched in partnership with the University of Leeds.

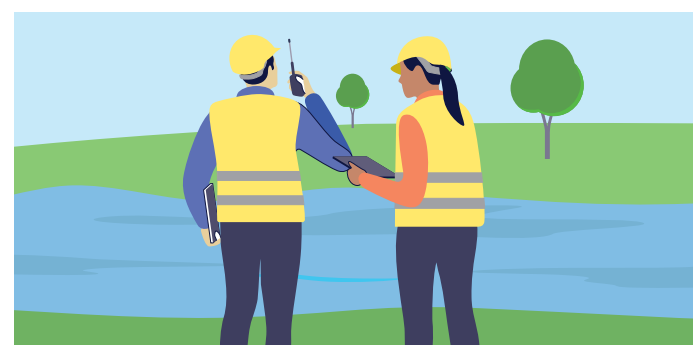

29 new Natural Flood Management projects funded via the NFM grant scheme.

149ha of fields aerated by Calder Rivers Trust to boost water infiltration.

## Community Resilience

Seven flood groups, helping communities prepare for, respond to, and recover from flooding.

Eye on Calderdale reached 44,000 users this year.

School outreach promoting flood safety & action plans.

Two FloodPod events delivered on risk and preparedness.

New GOV.UK flood warning system launched.
